How We Choose Our Doctors and Hospitals: All of our networks, including those used for our Marketplace Silver Plans, consist of a full range of primary care and specialist clinicians, and hospitals. When developing our networks, consideration is made of the location of all types of clinicians and hospitals in relation to where our members live. Our aim is for all members to have access within a reasonable distance to all types of clinicians and hospitals. The Plan includes clinicians and hospitals in our Marketplace networks based on their ability to provide care to members. For some of our Marketplace products that use a narrow network in Pennsylvania (PA), we select clinicians who are able to provide patient care in our Marketplace narrow network hospitals, who meet certain nationally recognized quality standards that are developed and approved by the National Committee for Quality Assurance (e.g., comprehensive diabetes care, colorectal and breast cancer screenings, and well child visits), and cost/utilization performance measures, such as risk adjusted total cost of care, compared to the market. We also select hospitals to participate in our narrow Marketplace networks in PA based on their agreement to accept the Marketplace reimbursement rate.

Sapphire Digital is a separate and independent company that provides a digital search tool licensed by Highmark to help Highmark members search for and obtain information on medical providers and facilities.
