

Save time and money. Switch to a 90-day prescription.

Your prescription benefits plan covers the option to fill medications for an ongoing condition like high blood pressure, diabetes, or high cholesterol (maintenance medications) at a retail or mail-order pharmacy. You have the convenience of obtaining a 90-day supply through your local pharmacy or via mail delivery at a lower cost.

Top three reasons to switch:

01

Get more for less

90 day prescriptions costs less than three claims for a 30-day supply.

02

You're more likely to take it, promoting better health

The above example of a preferred brand medication could save you... **\$50**

03

Easy two step ordering via mail service or a participating pharmacy

Step 1 Have your physician write your prescription to be filled in a 90-day supply *

Step 2 Take it to your participating pharmacy

To locate a pharmacy, go to [express-scripts.com](https://www.express-scripts.com) or use the **Express Scripts mobile app**
